We Help Kansas City Seniors Live Safely at Home

# Home for Life Design® Comprehensive Home Safety Assessment

## OVERVIEW

Home for Life Design® Comprehensive Home Safety Assessments are provided in order to identify **preventative** safety and accessibility issues within your **entire** home.

## GOALS

1. Includes functional testing (i.e., mobility, cognition, balance) to focus on fall prevention areas identified at the time of referral.
2. Within this assessment, the OT will address the entire home, including all entries.

## SPECIFICATIONS

This assessment is ideal for individuals who recognize that their needs are changing due to factors, including health and aging, and would like to proactively assess their functioning in their home environment for recommendations to address present and future needs.

## WHAT TO EXPECT

### Recommendations

This assessment targets urgent safety needs with recommendations for equipment, services, and support that are needed as soon as possible to address the concerns of the individual. The OT will provide a written summary of the recommendations to the client at the end of the assessment.

### Follow Up Sessions

If health conditions or functional problems are present that can be addressed in therapy, Occupational therapy treatment recommendations will also be provided. Occupational therapy plan of care of treatment visits are covered by Medicare with physician oversight.
